

## CL2QCD - Defect # 417: Dump functionality in SOA case for gm buffer

<b>Status:</b>	In Progress	<b>Priority:</b>	Normal
<b>Author:</b>	Christopher Pinke	<b>Category:</b>	
<b>Created:</b>	27 Jan 2013	<b>Assignee:</b>	Matthias Bach
<b>Updated:</b>	28 Jan 2013	<b>Due date:</b>	
<b>Description:</b>	In commit:f7dc99e9 I added dump functionality to the gm buffer. This is more a workaround to get the tests working, it is not done as in commit:f7dc99e9.  But can it stay like this or is the "Export..." function not good for that?

- Status changed from *Feedback* to *In Progress*

I actually think it's better to use the export-function directly. At least that's what I meant this function to be like. Otherwise we have cyclic dependencies (yes, they are there anyways, but they shouldn't be needlessly manifested) and it is somewhat unclear that the buffer.load triggers a rather complex action.

To be honest, the way I implemented it for SOA-Spinorfields is not really good.
